UNIVERSIDAD DE COLIMA

Summer Internships in Colima.

HOSPITALITY

International students will be able to strengthen their training by being integrated in real learning scenarios in the tourism industry.

The aim seeks to develop a meaningful learning making responsible for specific tasks in the reality of the workplace. The student may rectify or ratify the possession of the vocation of service, identifying the area of interest for the future professional development and also to build his/her resume. The performance on the company will be accompanied by a supervisor and an academic tutor.

INTERNATIONAL TRADE

The international trade internship allows student to apply and reaffirm the knowledge acquired in the classroom on economic issues, correct use of terms, instruments, proper application of customs law, document analysis, financial reporting, use free trade agreements, negotiation techniques and adequate development in public. The work environment is conducive to create awareness of the productive reality of the country.

CHEMISTRY

The international students will conduct research led by top researchers in the areas of natural products, organometallic chemistry, pharmaceutical chemistry, analytical chemistry, materials science and medicinal chemistry.

MEDICINE

The internship has been designed for international participants to understand the Healthcare System in Mexico either to observe medical procedures or to understand the basic elements of the public health system in Mexico. The program includes lectures, rotation in the Hospital Regional Universitario or in the Centros de Salud in the communities and reflections sessions during the internship. Students should have approved at least two years of studies in a Medicine School before coming to this internship

MULTIDISCIPLINARY COMMUNITY CARE

The international students will develop activities in community locations such as welfare centers, children's homes, community centers, nursing and schools to promote the positive development of children, adults and the elderly, especially those living in situations of risk and vulnerability by socioeconomic status.

GASTRONOMY

Students will have access to various areas of the Karmina Palace Hotel within the Food and Beverage department such as: bars, cold kitchen, hot kitchen, specialties, bakery, pastry, banquets, service and administration. The student will acquire skills like: achieving the optimization of inputs, standardization of recipes, collaborative work, preparation of Mexican dishes and beverage from various regions.
